EDUCATION

Toronto Metropolitan University

Sep 2022 – May 2027

Bachelor of Science in Computer Science

Toronto ON

- **Awards:** Dean's List x2, Computer Science Award (Top 3 Highest Scoring Student), Frances Gatto Award (\$1,100)
- **Relevant Coursework:** Object Oriented Programming, Data Structures and Algorithms, Machine Learning, Security
- **Affiliations:** Deputy VP Careers & Co-op, TMU Computer Science Course Union, Rewriting the Code

EXPERIENCE

Autodesk

May 2025 – Aug 2025

Incoming Software Engineer Intern

Toronto, ON

- Incoming intern at Autodesk, leveraging **Spring Boot**, **Go**, and **Amazon Web Services (AWS)** to develop scalable cloud licensing solutions.

Intuit

Jan 2024 – Aug 2024

Software Engineer Intern

Toronto, ON

- Achieved a **3 hour reduction** in release cycle time by building an internal widget to automate release processes and streamline CI pipelines using **TypeScript**.
- Designed, engineered, and deployed **3+** reusable web components using **React.js** and **Node.js**, optimizing their integration across **29,000+ webpages** in **4 core products**.
- Increased the efficiency of **11+** core web components by diagnosing and resolving **13** critical bugs, reducing risk of component failure during user interactions.
- Drove the research, design, and implementation of an internal **Code Connect** feature, resulting in a drop in production errors by streamlining the integration of codebases with design specifications.

monstrARTity

Oct 2022 – Apr 2024

Web Developer

Mississauga, ON

- Developed **20+ webpages** using **HTML**, **CSS** and **JavaScript** for **4+** artist programs, significantly enhancing the cross-platform user experience.
- Integrated secure payment methods using **PayPal API** for **50+ vendors' bookings**, ensuring secure and robust transactions.
- Improved organic search results by **37%** by implementing rich snippets and keyword optimization, enhancing the website's visibility and traffic.
- Achieved an increase of **10,000+** users in traffic by implementing performance enhancements, such as reducing page load times using **caching**.

PROJECTS

BaristaBot | *Python, FastAPI, Diagflow, MySQL*

github.com/barista-bot

- Developed a Python-based NLP-powered chatbot to automate customer orders, utilizing **Dialogflow** for natural language processing and **FastAPI** for robust backend API management.
- Implemented end-to-end chatbot functionalities, including order placement, status tracking, and error handling, with **MySQL** integration for efficient data management and real-time updates.

TripNest | *React, Node.js, Express.js, MongoDB, AWS S3*

github.com/booking-app-clone

- Developed a scalable full-stack booking application displaying 10+ property listings, allowing users to rent homes.
- Built responsive and modern user interfaces using **React** and **Tailwind CSS**, integrated with secure backend APIs developed with **Node.js** and **Express.js** to optimize performance and user experience.
- Designed and implemented robust authentication, registration, and data modeling for property listings and user profiles using **Mongoose** and **MongoDB**, ensuring privacy, scalability, and reliability.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, HTML/CSS, Elixir, Rust, C#, Golang

Frameworks: React.js, Node.js, Express.js, Spring Boot, Django, FastAPI, MySQL

Tools/Technologies: Linux, MongoDB, Git, Jenkins, Firebase, Postman, AWS, Figma, Docker, Kubernetes
